The Toyota T series is a family of inline-4 automobile engines manufactured by Toyota beginning in 1970 and ending in 1985. It started as a pushrod overhead valve design and later performance oriented twin cam variants were added to the lineup. Toyota had built its solid reputation on the reliability of these engines. The 4T-GTE variant of this engine allowed Toyota to compete in the World Rally Championship in the early 1980s, making it the first Japanese manufacturer to do so. Race engines bas

The Toyota K series is an inline-four engine that was produced from 1966 through 2007. It is a two-valve pushrod engine design, a rarity for the company. It was originally built from the Toyota Kamigo plant in Toyota City factory in Japan. All K series are non-crossflow engines - the inlet and exhaust manifolds are on the same side. They have cast iron blocks and aluminium alloy heads, with a crankshaft supported by five main bearings. K series motors have both hydraulic tappet or ...
