largely with the removal of solid contaminants from a flow of fluid, liquid or gas, where the degree of contamination is relatively low, but still unacceptable.

Filters and Filtration Handbook (5th Edition) - Knovel

The filters are divided by the force that

Bookmark File PDF Filters And Filtration Handbook Fifth Edition

causes filtration: vacuum (i.e., a negative pressure at the filter medium), gravity alone (i.e., the hydrostatic head of the liquid above the medium), centrifugal force (i.e., an amplified gravity effect), fluid pressure (imposed by the suspension feed pump), mechanical pressure (a squeezing effect), and the use of other force fields.
