into a rock strata on the model will be attached to a NYS map showing the regions covered by bedrock from various geologic periods and eras. (This lab is intended to be completed by students who have access to the NYS Earth Science Reference Tables ...

Teacher Resources - Regents Earth Science

Earth Science. Rock Layer Correlation Lab. Correlation is the process used by geologists (or stratigraphers) to "match" rock layers and formations of one outcrop to rock layers and formations of another outcrop that are of similar age. Correlation is done by matching rock layers by rock type, grain size, the presence of fossils and other distinctive features.
