### How to Day Trade "Small" to Produce Big Returns

We take profits when the price closes above the small bearish trend (blue line).Profit: \$0.16 per share. Since we are out of the market now, we need another price interaction with the bearish trend in order to enter the market. This happens 15 minutes later when price touches the trend line and prints a bearish candle.

### How to Take Profits when Trading

Less than 4.5 percent of day traders who try will be able to make a living from day trading. The chance of making a great living is much smaller.For the 4.5 percent that makes a living from the markets, it typically takes them six months to a year—dedicating full-time hours (about 30-40 hours per week) to education, practice, and trading—before they reach that level.
